## ProDuro

The LASER ProDuro is a completely renewed exhaust designed for rough terrain. With applications for supermoto's, MX bikes and in the near future ATV's LASER enters the off road market.

The shape of the ProDuro is unique, going from oval to the well known HotCam design.

LASER ProDuro is available in two versions, The ProDuro RX is meant for those who drive both road and off road and want to have the choice between street legal sound level or sport sound level.

The ProDuro ST is meant for the competition driver. It is light weight and has the opportunity to choose between FIM homologated sound or sport sound level.

Changing the insert could not be easier thanks to the unique removal tool (free with every exhaust). Furthermore it is made out of high quality materials, it is easy to fit and maintenance friendly.

Laser Exhausts

**Laser Exhaust Technology B.V. is a renowned company that has been heavily involved in the development and production of exhaust systems for motorcycles, scooters and cars since the company's early beginnings. Laser Exhaust Technology B.V. has its own modern production facilities, R&D departments and distribution & sales networks at its disposal.**

Laser Exhaust Technology is one of the biggest manufacturers of aftermarket replacement mufflers and high-performance exhaust systems. The keywords for any Laser product are design, performance and quality. Each exhaust is produced using high-quality materials after which it is tested extensively. Laser exhausts are also tested in the field by race teams that are active in World Superbike, Supersport and various National Championships.

The many years of racing experience ensure Laser to bring its products to an even higher level of both quality and performance.
